Wireless PDA
Work Order Inquiry

Add efficiency to your business with PDA interfaces and bar code applications

Now you can input and retrieve valuable information from your Epicor™ system whenever and wherever you are with our customized mobile computing solutions.

Our bar code and PDA applications are Microsoft-based, and run on Pocket PC devices. You don't have to have an existing Web site linked to your Epicor system. Our applications are stand-alone, so there is no additional software required for you to use our applications. All updates to your database use your existing ManFact™, DataFlo™ or Avanté™ business rules, so you can be assured of the integrity for every transaction.

Take a closer look at PDA Work Order Inquiry Screen

This application is used to quickly view work order details from your ManFact, DataFlo or Avanté system.

Begin the process by entering or scanning a work order number. The basic information will be displayed, including status, release date, due date, assembly number and a summary of completions, scrap and balance to complete.
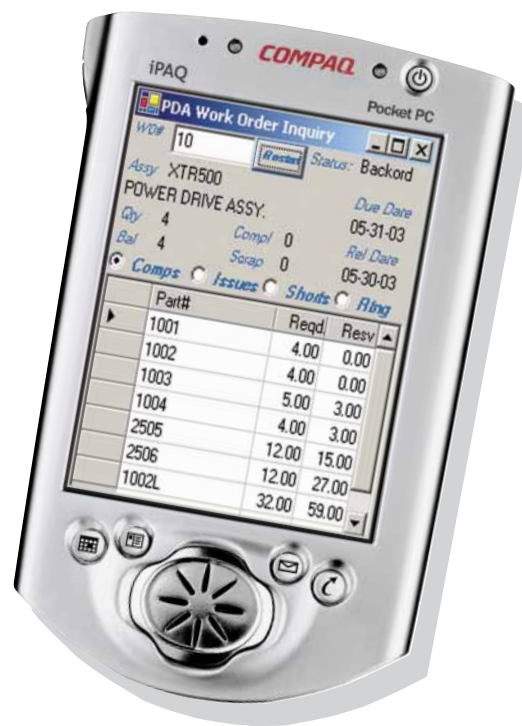

The lower portion of the screen allows you to quickly view the following information:

By clicking on **Comps**, all components part numbers on the picker will be displayed including the required quantity and the reserved quantity for each.

By clicking on **Issues**, the component and quantities that have been issued to the work order will be displayed, showing the balance due for each.

By clicking on **Shorts**, the shortages that have been created will appear with the corresponding quantity for each

By clicking on **Rtng**, each of the routing steps are displayed, with columns showing the work center, total quantity, current quantity and balance to be completed at each step.

See how QSS can make your system revolve around your business.
